

## **MICON FIRE CURTAIN**

Micon Fire Curtain is designed to serve in demanding industrial processes. This product is suitable for use in refineries and related industrial facilities. The silicone coating is able to withstand chemical attack by water, certain acids and bases and many petroleum based chemicals. It is able to create viable fire breaks. This product is also used for curtaining in shrink tunnels.

### **TYPICAL PROPERTIES**

Weight	330g/sq.m(+5%)
Materials	Woven fibreglass and silicone resins
Thickness	0.24 nominal
Colour	Silver
Width	1000mm
Tensile strength	500 x 340 (N/cm)
Upper Use	Temperature 200 deg C continuous
Percentage Silicone (by weight)	36%

### **IMPORTANT PROPERTIES**

High temperature resistant  
Chemical resistant  
Oil resistant  
Water resistant  
Easily fabricated  
Resistant to weld splash

### **IMPORTANT APPLICATIONS**

Curtaining in shrink tunnels
