

WOODSAYF

1. General Description

An aqueous fire retardant for the protection of timber used in building, hospitality and home applications. The chemical in this product reacts chemically with the wood preventing leaching and forming of esters in the timber resulting in a new timber/chemical compound.

2. Physical Properties

Viscosity	: -
SG	: 1.17g/cm ³
Touch Dry	: 15 minutes
Full Cure	: 24 hours
Over Coating Period	: 24 hours
Shelf Life	: 12 months
Volume Solids	: 55 %
Spread Rate	: 4-6m ² /litre
Total Recommended d.f.t.	: 2 – 3 coats
Colour Range	: Clear
Flash Point	: 80° Celsius
Packaging	: 5 litre 25 litre

3. Surface Preparation

The timber must be raw uncoated and untreated

4. Application

Can be applied by brush, roller low pressure spray equipment and/or dipped

5. Cleaning of Equipment

Clean equipment with water after use
